

### Graphite® 10" Indoor/Outdoor Modular HMI

Offers drag-and-drop protocol conversion, data logging, and web-based monitoring and control in harsh environments. A variety of expansion racks and plug-in modules allows for easy application customization. Powered by Crimson® software which allows for easy configuration. Built-in data logger records continuous data and includes events and alarms.

### Flexedge® DA70A 3-Sled Modular Automation Controller

Provides powerful data access capabilities with cybersecurity features. Modular hardware and software provide flexibility and scalability to suit application needs. An all-in-one protocol converter, router, cellular gateway, and more. Rugged design for reliable performance in harsh environments. Quickly moves critical data to cloud-based IIoT systems for secure remote access.

### Harmony22 mm XB5R/XB4R Wireless Push Buttons

Offers a convenient solution for enhancing productivity and mobility. Utilizing innovative wireless technology, these push buttons require no batteries and are easy to install in both new and existing applications.

### Harmony SSP1 Solid State Relays

Provides high-performance switching solutions designed for automation and control applications. With their compact design and reliable operation, these relays ensure quick response times and enhanced system efficiency, making them ideal for a wide range of industrial uses.

### TeSys Ultra Combination Motor Starter

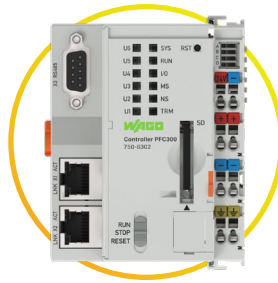

Provides motor control for a wide range of applications. Using a plug-in modular design, TeSys Ultra allows for maximum flexibility in motor control. TeSys Ultra is a self-protected combination starter, ensuring a coordinated combination starter that will clear a detected fault and protect itself from damage.

Family-Owned. Community-Grown. National Presence.  
Powering the communities we serve through teamwork and relentless customer focus.

### PFC300 Controller

Compact PLC for the modular WAGO I/O System. Supports all digital, analog, and specialty modules found within the 750/753 Series. Typical applications for the PFC300 include standard machinery and equipment control (e.g., packaging, bottling, and manufacturing systems, as well as textile, metal, and wood processing machines).

### Base Power Supply Series

Offers reliable, efficient performance with front wiring and Push-in CAGE CLAMP® connections for tool-free setup. With compact, durable metal housing and a wide temperature range of -30°C to +70°C, it's the cost-effective solution you can trust. Highly efficient means less heat dissipation, less need for cooling, and smaller enclosure.

### XUN Photoelectric Sensors

Next-generation dual mount photoelectric sensor designed for superior performance and effortless integration into automation equipment.

### IO Link Master

Provides remote access from the sensor to the PLC/Control allowing for extended diagnostics and predictive maintenance

### XCMH Basic Miniature Limit Switch

Robust, easy-to-install, and cost-effective miniature limit switch, perfect for industrial applications with limited space.
