

Residential Enclosed Circuit Breakers

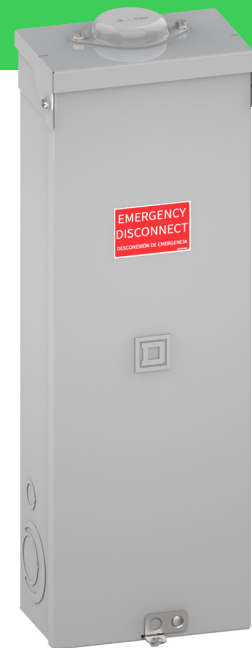

A compact and flexible 2020 NEC® compliant residential service entrance device

Looking for an efficient solution to meet code?

Article 230.85 (Emergency Disconnects) of the 2020 National Electrical Code® (NEC®) requires all single and two family dwellings to provide a disconnecting mean installed in a readily accessible outdoor location.

Be quick and effective!

Square D™ Residential Enclosed Circuit Breakers are designed to be code compliant, easy to install, customizable, and highly reliable. These rainproof Residential Enclosed Circuit Breakers are suitable for use only as service equipment since they feature a service entrance barrier, factory installed neutral bar bonded to the enclosure, factory applied emergency disconnect, and service entrance labels, and the ability to select between factory installed molded case circuit breakers (150 to 200A @ 25kAIR) or field installable molded case circuit breakers (70 to 200A @ up to 100kAIR).
