Marketing Model/Name:

The End of Life Instruction (EOLI) covers the LTM CU operator control unit intended to operate within the motor management system TeSys T range.

Purpose:

The product family must be disposed according to the legislation of the country. This document is intended for use by end of life recyclers or treatment facilities. It provides the basic information to assure an appropriate end of life treatment for the components and materials of the product.

Note :

This product family is in the scope of EU directive 2002/96/EC, Waste Electrical and Electronic Equipment (WEEE).

Size in mm

H x L x D in mm: 70 x 117 x 50

Weight in kg : 0.400 kg

Operations recommended for the end of life treatment

There are several steps to process the products at the end of life so as to recover components, materials or energy : Reuse → Depollution → Dismantling → Shredding.

The components of the products that optimize the recycling performances are listed, identified and located hereunder.

This product contains a printed circuit board which is recommended to be treated separately during the End of Life operations.

Number on drawing	Components	Weight (g)	Comment
Components listed for special treatment			
1	Printed circuit board	55.37 g
