

Trac-Master™ Professional Halogen Series

Quality display lighting for commercial spaces

JUNO®

Trac-Master™ Professional Halogen Series

The halogen Cylindra™, Conix® and Pro-Gimbal fixtures integrate handsome styling with features ideally suited for professional-quality display lighting. All three models can accommodate up to two light control accessories including louvers, spread lenses, color correction filters, color filters and UV filters. The Conix and Pro-Gimbal models offer aiming and rotation locks to maintain positioning during relamping. Models are available for both line voltage and low voltage applications: PAR halogen Cylindra, Conix and Pro-Gimbal for line voltage; MR16 halogen Cylindra and Conix for low voltage.

Pro-Gimbal

The versatile design uses PAR lamps, relamps from the front and features deep lamp shielding with a baffled aperture. The Pro-Gimbal can be easily accessorized with up to two light control accessories using the optional accessory holder. It features 360 degree plus rotation to eliminate aiming dead zones. Rotation and aiming can be locked into position using a standard Phillips screwdriver.

Cylindra™

Applying a new twist to a traditional design, the Cylindra Series offers a unique, contemporary aesthetic based on a step cylinder fixture platform. Gentle arcs elegantly blend with bold edges to provide a unique yet timeless visual appeal. Cylindra's close-to-track mounting minimizes its visual intrusion into a space. Cylindra accommodates a wide range of halogen lamps including PAR20, PAR30, PAR38 and low voltage MR16. All are constructed of rugged die cast aluminum.

Professional-Grade Media Cartridge

All Cylindra lampholders feature a quick-release bayonet-mount media cartridge that simultaneously accepts up to two light control accessories. Media can be easily installed or removed without the use of tools. The bayonet-mount attachment simplifies relamping and fixture maintenance, making Cylindra a popular choice with owners, designers and installers.
