

94369

WHITE VINYL COLOR CODE TAPE

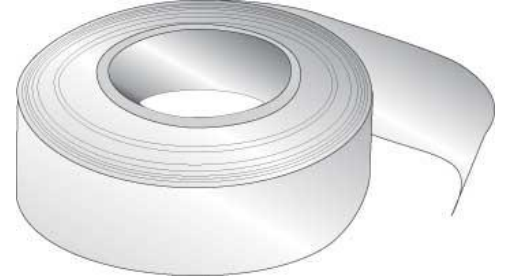

UPC: 085937943699

Country of Origin:

UNSPSC: 31201502

Taiwan

Commodity: Electrical insulating tape

Outstanding electrical and mechanical properties make this tape excellent for use in phase identification, color coding of motor leads and piping systems, and for marking safety areas.

Product Attributes

Brand Name	Minerallac Company
Sub Brand	Cully
Type	PVC Electrical Tape
Special Features	Remains flexible even in extreme temperatures.
Application	Color coding for phase identification, job identification and safety; Insulating electrical wiring; Protecting electrical conductors, motor leads and piping from moisture, alkalis, acids, corrosion, abrasion and weather.
Material	Polyvinyl Chloride (PVC)
Color	White
Length	60' FT
Width	3/4" IN
Thickness	7 MIL
Temperature Range	Can be applied from 40°F to 176°F.
Backing Material	Vinyl

Item Status: Active

Standard Qty: 10
