Founded on the philosophy that high-quality commercial and residential lighting should be sold at a fair market price, Elco Lighting has continuously illuminated residential and commercial spaces for almost two decades. We invite you to explore our latest pocket catalog.

Inside you will discover thousands of offerings in recessed downlighting, from line and low voltage housings and trims to compact fluorescent and H.I.D., with aperture sizes ranging from 3" to 10."

Brushed nickel, copper and bronze finishes are the highlight of our latest trim and track selections.

Included is our newest offering in track lighting, Elco Lighting's FlexMotion Rail System, featuring new high-tech fixtures and a series of designer pendants that adapt to all of our systems—standard track, mini-track, canopy or FlexMotion Rail.

Also new is our LED mini step-lights and LED rope lighting, with much more LED product coming soon.

And of course our mainstay of under cabinet fixtures, featuring incandescent, fluorescent and Xenon options, as well as indoor/outdoor step lighting and exit/emergency lights.

We hope this comprehensive collection helps you succeed with any design requiring general, task or accent lighting.

Angle Cut Baffle

The baffle cylinder is molded on an angle. The baffle grooves remain parallel to the floor providing proper optics and cosmetics.

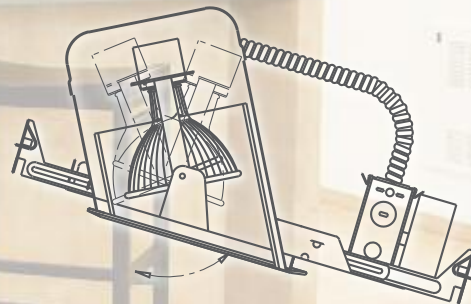

Elliptical Trim Ring

Die-formed trim ring precisely fits the slanted baffles elliptical aperture for a clean appearance and perfect function.

Adjustable Lamp

Sloped ceiling trims allow for vertical lamp aiming on ceiling slopes from 2/12 to 12/12.

Adjustable Socket Bracket

Elco's adjustable socket bracket (U.S. Patent No. 5,548,499) allows for easy and consistent lamp adjustments after the lamp is installed. It swivels and rotates to effortlessly align the lamp plumb with the floor or at an angle to the wall. This patented socket bracket is available on the EL616K and EL622K trims (pages 20, 21).

Each trim comes with:

(1) ETRK50 12V 50VA Transformer

Attaches to interior of Line Voltage housing via screw base adapter and converts to Low Voltage housing for use with Low Voltage MR16 trims.

For an **ELECTRONIC** transformer order the **ETRK50E** and the Low Voltage trim of your choice.

(1) 5" Low Voltage Trim

5" Low Voltage Retrofit Trims

- 50W max for non IC housings.
- 20W max for IC housings.
- Trims are for use on existing line voltage housing.

COMPACT FLUORESCENT RECESSED LIGHTING 75-125

Advances in compact fluorescent lighting (CFL) have made CFL the preferred choice in both residential and commercial applications. The increased energy savings and efficiency of CFL recessed lighting have also made its immediate benefit widely popular over traditional incandescent lighting. Elco has been on the forefront with a large selection of recessed CFL lighting options available. Elco uses only brand name all American ballasts included in our compact fluorescent housings. 347V available for all CFL housings, consult factory.

In this section:

9", 8", 7", 6", 5" and 4" CFL housings
A complete line of CFL trims
Vertical and horizontal housing
Square housing
Remodel housing
IC Airtight housing
Sloped ceiling housing and trims

Available Dimming Ballasts for CFL Housing

D

Standard dimming ballast (type D), Advance Mark 7 (or equal), 120/277 Intelli-volt, high power factor, 0-10V DC, 100%-3% dimming range. Requires running 4+ground wires (black, white, ground for line supply and purple and gray wires for 0-10V DC control voltage) from the dimmer switch to the ballast (to be used with compatible dimmer).

DX

Advance Mark 10 (type DX) dimming ballast, 120V, high power factor, 100%-5% dimming range. Requires running 2+ground wires from dimmer switch to the ballast (to be used with compatible dimmer).

DX-7

Advance Mark 10 (type DX-7) dimming ballast, 277V, high power factor, and 100%-5% dimming range. Requires running 2+ground wires from dimmer switch to the ballast (to be used with compatible dimmer).

D1

Advance Ambistar (type D1) dimming ballast, 120V, normal power factor, 100%-15% dimming range. Requires running 2+ground wires from dimmer switch to the ballast, can be used with any standard dimmer switch (for best performance use with Advance Mark 10 compatible dimmer).

D-Lutron

Lutron type Compact SE dimming ballasts, 120V or 277V, high power factor, 100%-5% dimming range. Requires running 3+ground wires from dimmer switch to the ballast (to be used with compatible dimmer).

D-Lutron

Lutron type Tu-Wire dimming ballasts, 120V, high power factor, 100%-5% dimming range. Requires running 2+ground wires from dimmer switch to the ballast (to be used with compatible dimmer).

COMMERCIAL RETROFIT 137-142

The Elco Lighting Retrofit System is designed for easy install using a simple system of high-quality reflectors, specialty trims, ballasts and mounting clips. Minimal tools are required since the system snaps easily into the existing downlight's mounting frame. Unlike typical residential retrofit systems, Elco's Commercial Retrofit System allows for easy lamp replacement because the ballast is permanently installed and separate from the lamp.

In this section:

7" Architectural retrofit kits and trims

Also:

A complete selection of Elco CFL retrofit kits in 9", 8", 7", 6" and 5" sizes not included in this catalog are available by contacting your local Elco representative or by ordering the Elco Commercial Retrofit catalog.

Why Retrofit?

Newer mandates against traditional incandescent lighting sources, and a push for green energy saving solutions, make it clear to consider Elco's energy efficient architectural compact fluorescent retrofit housings. Compact fluorescent lighting increases visual comfort while costing an average of 50 to 75 percent less in energy use. Additional savings is often available through local utility rebate programs designed to encourage energy-saving retrofit projects. CFL lamps are 4-5 times more efficient than incandescent lamps and last up to 10 times as long, and the cost of retrofitting is usually recuperated between 12 and 24 months from install.

In a recent Elco retrofit project for the Marriott Hotel in downtown Portland, 250 twin 42-watt dimmable compact fluorescent fixtures were used to replace energy-wasting 300W incandescent fixtures. The new Elco fixtures doubled the light output at one-third the cost, reducing their energy use by 86%, based on lights under operation 12 hours per day, 365 days per year. In the energy-conscious environment we live in today, no one can afford to ignore results like these.

“We had four primary objectives... be within budget parameters, use existing dimming system, achieve acceptable light levels and reduce energy costs. We accomplished all four of them with the Elco products.”

Portland Marriott Hotel
Senior Engineer William Moore

STEP AND BRICK LIGHTS 157-166

Now Elco offers a wider range of products in this category utilizing different light source technologies such as incandescent, fluorescent and LED's. These products are designed for outdoor or indoor installation in IC or non-IC, brick, wet or poured concrete applications. Our new line of mini-step lights has combined advantages of ease of installation and versatility as well as energy efficiency (for LED models). These products are also available in nickel and bronze finishes

In this section:

OUTDOOR LIGHTING 167-172

Whether you need die cast aluminum or standard housings, compact fluorescent H.I.D. wall packs (metal halide or high pressure sodium), Elco Lighting has the fixture for you. U.L. listed for wet locations, Elco's outdoor lighting products are perfect for multiple applications like: parking areas, perimeter lighting entrance and walkways, waterfront, loading, platforms, recreational areas and more.

In this section:

Metal halide wall packs
High pressure sodium wall packs
Metal halide / high pressure sodium / compact fluorescent floodlights

Features

- Die cast aluminum housing
- HID lamp included
- UL listed for wet location
- Wall mount directly over standard 4" outlet box or with surface conduit for indoor or outdoor applications.

Medium Metal Halide Wallpack

- Medium base socket
- 13 3/16"W x 9"H x 7 1/4"D
- Multitap (120V/208V/240V/277V) N.P.F. ballast
- USA made
- HID lamp included
- UL listed for wet location

EXIT AND EMERGENCY LIGHTING

173-192

Elco Lighting's high quality, affordable Exit and Emergency fixtures provide a variety of different styles and benefits designed to meet the requirements of any application. Dual voltage options (120 and 277 VAC), brown-out activation (unit automatically switches to emergency mode if supply voltage drops below 80%), automatic low voltage disconnect, thermal protection, short circuit protection and reverse polarity protection are just a few of the important standardized features of these products. Our emergency lights are available in long-life, energy-saving LEDs, self-powered, battery back up, incandescent, self-illuminating, and emergency light/exit combos. Elco's has a line of emergency fluorescent downlights available in a variety of sizes with a wide selection of attractive reflective and baffle trims.

TRACK LIGHTING

193-239

Track lighting has become an instant style upgrade to any home or commercial space. Because of this, we at Elco have put a lot of thought and care into the manufacture of our Track lighting line. Elco Lighting is proud to present a variety of high-tech affordable track systems. We have improved and created new lines of track and track fixtures that will be an attractive addition to any commercial or residential application.

In this section:

- 1 and 2 circuit track systems
- Line and low voltage track systems
- Line and low voltage track fixtures
- Flexmotion Rail System
- New designer pendants
- Track accessories

FLEXMOTION RAIL

LAMP: 120V 50W MR16 GU10 base

Elco Lighting's New FlexMotion Rail is a two-circuit, 120V system. It is available in 4', 6', 8' and 12' and does not require additional equipment to bend in the field. FlexMotion is flexible from the start and takes its shape by the placement of the stand-offs that hold it. A sleek array of 120V, 50W MR16 GU10-base fixtures provide a stunning, contemporary look. Elco's line voltage pendants also offer a colorful addition to the FlexMotion Rail System.
