PROJECT INFORMATION

Project Name _____

Catalog No. _____

Date _____

LX Switch Stations are designed for virtually any area. The soft contours of its architecturally-pleasing design fit easily into any décor. Each switch can be individually programmed to control a single relay, group of relays, or preset scene.

In addition to flexible switch functionality, LX Switch Stations can be programmed to be active only during a specific time window. This function allows the switch station to be automatically secured when they are not being used, which eliminates the need for lockout key switches and locking covers.

PRODUCT FEATURES

- Attractive, architecturally-pleasing design
- Flexible programming of switch functionality
- Programmable active and inactive times
- Topology-free, polarity-insensitive, 2-wire communication
- FT-10 and LPT-10 versions available
- LonMark® certified
- 1–6 buttons with or without pilot
- Mounts to standard single-gang box
- Five-year limited warranty
