

36A00-1

Lighting Controls

Brand Features

HLC Powerline Interface Module with cable for Omni and Lumina controllers; A UPB Powerline Interface Module (PIM) will connect your lighting system to a UPB compatible home control system or to a computer, which can then control your UPB lights. It comes with a cable for connecting the PIM to a serial port on a Lumina, Lumina Pro, Omni LTe, Omni II, Omni Ile, or OmniPro II home control system. The status light on the PIM will blink red when it transmits a UPB signal on the powerline and it will blink green when it receives a valid UPB signal on the powerline. The UPB PIM to computer cable is used to connect the PIM to a computer's standard DB-9 serial port for use with UPB UPStart configuration software. 110V.

Item Description

UPB™ Powerline Interface Module (PIM).

Features and Benefits

- This PIM connects UPB™ lighting systems to an automation system or computer, which can then control the lights based on schedule or event
- The PIM makes the lighting system accessible through the home computer or from a remote location over the Internet
- Comes with a cable for connecting the PIM to a serial port on a Leviton security & automation system.
- Leviton Part Number: HL361
