

RELAY-2PL

Brand Features

Leviton's Z-MAX relay cards are the "heart" of the Z-MAX system providing the actual control of the load as directed by the control electronics. Z-MAX products use individual relay cards for each circuit allowing for the most flexibility in matching the relay type to your specific requirements. The benefit of a single relay card for a single circuit allows an infinite arrangement of relay type to position in your system and supports individual replacement should the need ever occur. For maximum equipment protection, the standard 30A relay card has an SCCR rating of 18,000A to allow it to withstand higher current inrushes caused by short circuit conditions.

Item Description

EZ-MAX® 2-Pole N/O Relay Card, 20A, 208-480V, Title 24 compliant, ASHRAE 90.1 compliant

UPC Code: 07847719301

Country Of Origin: Mexico
