## Nova TM Controls

This series of classic thin-profile linear-slide dimmers and switches offers the following standard features:

- Square Law Dimming
- Voltage compensation (not applicable to NTCL-250)
- Power-failure memory
- Superior RFI suppression
- Captive linear slider
- Accessible air-gap switch
- Electrostatic discharge tested
- Precise color matching
- Heavy-duty components for surge protection and long product life
- 100\% factory tested

## Product Family Features

- Available for 120-277 V~ line voltage switching (sink- only control) 0-10 V=-- LED drivers and ballasts (power pack not required for loads up to 8 A)
- Excellent for residential or commercial applications
- Intuitive operation; easy to use
- Slide-to-off and preset models available
- Enclosed heat sink for aesthetically pleasing appearance
- Multi-gang alignment for quick and easy installation
- Full family of products for most lighting sources, plus matching accessories and wallplates
- Rated at $120 \mathrm{~V} \sim 60 \mathrm{~Hz}$, unless noted otherwise
- Custom products (CPN) are available to meet specific customer needs. Please contact Lutron Customer Assistance at 1.844.LUTRON1 (588.7661) for availability.

## Regulatory Approvals

- UL® Listed
- CSA certified
- NOM

## Colors and Finishes

When ordering product for use with metal wallplates, the product and wallplate must be ordered separately. See the "Architectural Wallplates and Accessories" section of Volume 1: Basic Devices and Single-Space Systems Catalog (P/N 367-1746) for ordering procedure. See table to the right for complete list of metal finishes.
Custom color matching is available for all Nova TM products. A swatch or sample is all that is required. Call customer service to arrange for a color-matched control.

## Application requirements

－When dimming LEDs or CFLs，only bulbs marked or rated as dimmable and on the recommended list may be used．
－For a complete list of recommended dimmable LEDs and CFLs please visit www．lutron．com／dimcflled．For questions call 1．844．LUTRON1．
－Some dimmable LEDs and CFLs require a minimum number of bulbs for proper operation．For details and the bulb list，visit www．lutron．com／dimcflled
－For LED product selection tool，visit www．lutron．com／ledtool
Features：
－Low－end adjustment to accommodate a wide range of bulbs．
－HEDT Technology：Advanced Lutron dimming circuitry designed for compatibility with most high efficacy light bulbs．
－NEMA SSL－7A Type 2 compliant．
Electronic Low－Voltage（ELV）Dimmers：Slide－to－Off

| Small Control | Description | Maximum Capacity | Model Number |

－Maximum capacity is permitted lamp wattage．
－Requires neutral wire connection．
－For larger capacity ELV loads（up to 1000 W），use Nova TÁs fluorescent dimmers（NTF－10－XX or NTF－103P－XX）with a PHPM－WBX interface．
－Minimum Load： 5 W Incandescent／Halogen or 1 ELV transformer．ELV transformer must be loaded per manufacturer＇s recommendations．

## Derating: Maximum Capacities in Multigang Installations*

When installing more than one dimmer in the same wallbox, it may be necessary to remove some side sections prior to wiring (see diagram below). Removal of side sections may reduce maximum wattage, as shown in the charts below.
Mixing bulb types (using a combination of LED / CFL and incandescent/halogen bulbs) will also affect the maximum ratings, as shown in the charts below. Example: If one set of side sections is removed and you have eight 9 W LED bullos installed (Total LED Wattage $=72 \mathrm{~W}$ ), you may add up to 500 W of incandescent or halogen lighting with the $\mathrm{C} \bullet \mathrm{L}$ control or 300 W with the Reverse-Phase control.

## Wiring Diagrams: NTSTV- Controls

- The total $0-10 \mathrm{~V}=-=$ control signal wiring for this control should not exceed $500 \mathrm{ft}(152.4 \mathrm{~m})$.
- Do not use wire smaller than 20 AWG ( $0.75 \mathrm{~mm}^{2}$ ).
- For Class 1 installations, $0-10 \mathrm{~V}=-=$ wires must be run in conduit or approved cable per NEC® or local jurisdiction.
- For Class 2 installations, conduit is typically not required (local code may apply).
- For application with excessive electrical noise, $0-10 \mathrm{~V}==-$ wires should be run in separate conduit from the mains.

Class 1 Installation

- NTSTV-DV-XX
* Whichever comes first.

(1) Wire connector

- Wire connector
(4) Typical 4-wire connection
a Do NOT connect to line voltage
b 18 AWG ( $1.0 \mathrm{~mm}^{2}$ ) red wires are interchangeable. Connect to either line or load side
${ }^{\text {c }}$ Green wire may be capped for Class 2 installations ONLY

Class 2 Installation
ON/OFF control using Power Pack (PP-DV or PP-347H)
Neutral

Notice

- Lutron is not liable for damage due to miswiring $0-10 \mathrm{~V}=-$ control signal wires with line voltage.
- Do not run Class 2 wires and line voltage conductors together in the same conduit.
