H703PTUTC

A simple dimming solution for you and your customers

Harmony™ Tru-Universal Dimmers do something today's dimmers don't: **they simply work –** with every lamp, every load, and every fixture on typical residential and light commercial wiring.

Once a user selects the lamp type, the dimmer's self-calibrating technology automatically sets the minimum voltage of that lamp. That means no more flickering lights, no more frustrated customers and no more unnecessary callbacks. And because it's the one product in the category that lives up to its universal name, it dramatically reduces the number of SKUs as well.

Ideal for residential and light commercial applications, the Harmony Tru-Universal Dimmer is the simple solution to all your customers' dimming challenges.

FEATURES & BENEFITS

Self Calibration feature allows users to select lamp type, which then automatically sets the minimum voltage for that lamp, eliminating flickering and poor performance.

**Works with every lamp and load** on typical residential and light commercial wiring.

Convenient operation combines On/Off Decorator switch with separate slider for dimming control.

Preset, Single Pole and 3-Way operation.

Green LED glows when off to make dimmer easy to find in the dark.

Sleek, ergonomic design that matches today's styles

Wider slide controller for easier dimming operation.
